Sirius - LED Freestanding LED's

Step 1

Action 1	Dismantle Spigot 'A'
Action 2	Reassemble Spigot 'A' through base plate 'B'
Action 3	Slide profile post 'C' over 'A'
Action 4	Tighten with Allen key (provided)

Step 2

Action 1	Slide the 4x toggles into the channel
Action 2	Channel is on rear of post 1
Action 3	This post will also take the transformer box
Action 4	Fit post 2 with 2x toggles

Step 3

Action 1	Offer bracket to top of post
Action 2	Resting the bracket plate on the front of the post
Action 3	Now line up the toggles
Action 4	Tighten the bracket to post

Step 4

Action 1	With the help of 1 or 2 assistants
Action 2	Offer the Light Pocket Panel to the brackets
Action 3	line up the holes on panel with those in the middle of the brackets
Action 4	Once located, fit the bolts and brass ferules through the panel - loose fit!
Action 5	Repeat this action until all bolts and brass ferules are connected (loosely)
Action 6	Once all loosely fitted - tighten the nuts
Action 7	When all fitted - add the metal caps
Action 8	Now fit the transformer Box
