

Hook-On-Acrylic "WALL" Display Sets (Fitting Instructions)

Hook-On Acrylic Sets

< Main Image

This reveals 4x Hook-On Acrylics
They are hooked over a 6mm rod
Rods are held in place by Wall Holders

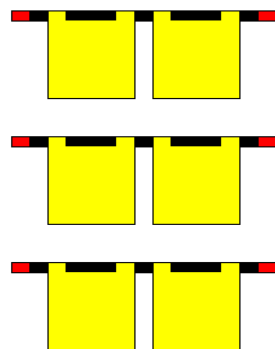

Wall Holder, for Rods

1. Rear Section comes apart
2. Allowing a hidden screw wall connection
3. Front Section has a channelled groove
4. Allowing a 6mm rod insertion

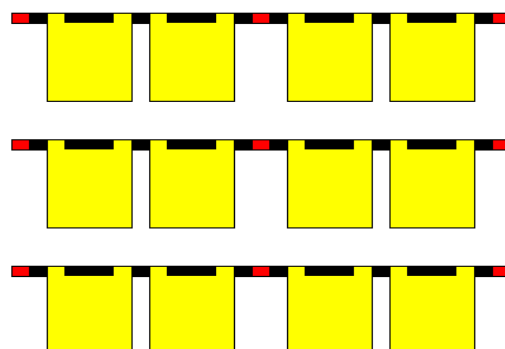

Rods - 500mm + 1000mm + 1500mm

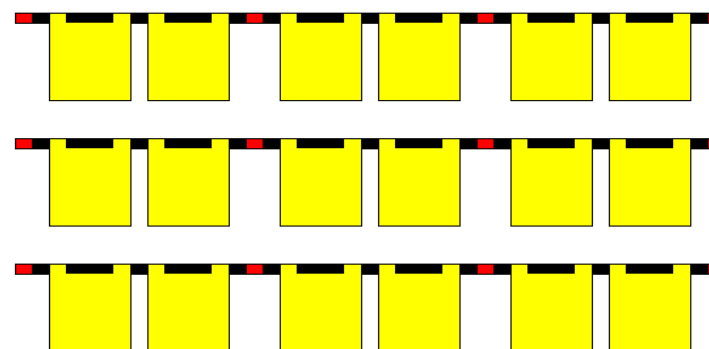

1000mm Rod
500mm Rod - has 'Male & Female' Ends
1500mm Rod - has 'Male & Female' Ends
(Male & Female ends allow rods to be extendable)

Option 1 - 2 Across by 3 Down

Option 2 - 4 Across by 3 Down

Option 3 - 6 Across by 3 Down

Hook-On-Acrylic "WALL" Display Sets (Fitting Instructions)

Calculating the Space Required for each of our 3x Options

A5 Portrait:

Option 1 -

Consisting of = **6x A5 Pockets**
Consisting of = 3x 500mm Rods
Consisting of = 2x 4M Cables
Space required = **W540mm**

A5 Portrait:

Option 2 -

Consisting of = **12x A5 Pockets**
Consisting of = 3x 1000mm Rods
Consisting of = 2x 4M Cables
Space required = **W1040mm**

A5 Portrait:

Option 3 -

Consisting of = **18x A5 Pockets**
Consisting of = 3x 1500mm Rods
Consisting of = 2x 4M Cables
Space required = **W1540mm**

A4 Portrait:

Option 1 -

Consisting of = **6x A4 Pockets**
Consisting of = 3x 500mm Rods
Consisting of = 2x 4M Cables
Space required = **W540mm**

A4 Portrait:

Option 2 -

Consisting of = **12x A4 Pockets**
Consisting of = 3x 1000mm Rods
Consisting of = 2x 4M Cables
Space required = **W1040mm**

A4 Portrait:

Option 3 -

Consisting of = **18x A4 Pockets**
Consisting of = 3x 1500mm Rods
Consisting of = 2x 4M Cables
Space required = **W1540mm**

A3 Portrait:

Option 1 -

Consisting of = **6x A3 Pockets**
Consisting of = 3x 1000mm Rods
Consisting of = 2x 4M Cables
Space required = **W1040mm**

A3 Portrait:

Option 2 -

Consisting of = **12x A3 Pockets**
Consisting of = 3x 1500mm Rods
Consisting of = 2x 4M Cables
Space required = **W1540mm**

A3 Portrait:

Option 3 -

Consisting of = **18x A3 Pockets**
Consisting of = 3x 2000mm Rods
Consisting of = 2x 4M Cables
Space required = **W2040mm**

Hook-On-Acrylic "WALL" Display Sets (Fitting Instructions)

Fitting Instructions for a "WALL" Fitting

Ceiling Cables

- 1 Decide where your display will start - (We would advise working left to right)
- 2 Now check that the ceiling is sufficient to support the suspended weight
- 3 Now connect your first ceiling cable to your selected ceiling area
- 4 Now measure the supplied Rod Width and connect your 2nd ceiling holder
- 5 At this point you should have 2x suspended ceiling cables

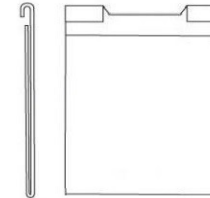

Rods

- 1 Slide 3x Rod Holders onto each suspended cable - roughly secure to the cables
- 2 Now connect the rods to the ceiling holders
- 3 Now utilising a spirit level - 100% level the 'Highest Rod'
- 4 Now Hook Over your Hook-On Acrylics
- 5 That's, the Highest Rod fully completed
- 6 Now decide the wanted gap for the 'Central Rod' - measuring from the bottom edge of the Hook-On Acrylic
- 7 Now Hook Over your Hook-On Acrylics
- 8 That's, the Central Rod fully completed
- 9 Now decide the wanted gap for the 'Lowest Rod' - measuring from the bottom edge of the Hook-On Acrylic
- 10 Now Hook Over your Hook-On Acrylics
- 11 That's, the Lowest Rod completed

Floor Cables

- 1 At this point you should have all 3x rows of Rods in place with all Hook-On Acrylics attached
- 2 Now for the finishing i.e. the floor cables.....
- 3 Ensuring the cable is 100% straight - mark the floor and add the floor holders into place
- 4 Now we need to cut-out any excess cable.....
- 5 To do this, over estimate the required length to the floor - **Not the Top of the Floor Holder - THE FLOOR!**
- 6 Now make your cable cuts
- 7 Now secure the cable into the floor holders
- 8 IF you find the cables are still loose, repeat the cutting process but, take your time

Acrylic Measurements:

A5 Portrait

W150mm x 225mm

A4 Portrait

W210mm x 315mm

A3 Portrait

W297mm x 437mm
